Tellimero – the new
expanded version
details page 6

Dear B2B partners

As we present this year's B2B catalogue, we would like to share a brief overview of current focus areas and selected highlights from our range. Educational institutions continue to rely on functional, durable and clearly structured equipment for everyday use. This catalogue is intended to support schools, kindergartens and other educational institutions in their planning and procurement with practical solutions.

This year's new products focus on digital learning, sustainability and organisation. A key highlight is Tellimero EDU (pp. 6–7) with all accessories such as freely recordable stickers and the matching storage bag. The talking pen has an integrated display that shows the battery status, Bluetooth connection and key lock, as well as a right/wrong indicator for logical tasks. Silent mode allows it to be used during quiet learning phases or for individual work. Typical areas of application include self-checking maths problems, vocabulary training with audio support, storytelling with picture books, or adding background information to worksheets and books.

Further new products include treeNside tableware (pp. 2–3) for daily use in schools and childcare facilities, as well as treeNside storage boxes with matching lids (pp. 12–13), which support clear organisation of learning materials, games, and everyday supplies in classrooms and group rooms.

In addition to these new product groups, the catalogue presents established highlights that support movement, outdoor activities, and subject-based learning. Bouncy cushions (p. 19) can be used for balance exercises and active breaks, while Betzold outdoor vehicles (p. 17) promote movement and social interaction in outdoor areas. For science education, "Zones of the Pond" and the station box „Alternative energies" (p. 8) enable hands-on exploration of ecological topics and renewable energy through station-based learning. Thank you for your continued trust and cooperation. We look forward to supporting your work throughout the year with reliable and practical solutions for educational environments.
